1. Nature of operation

During fiscal 2009, the Corporation sold its spectrum and broadcast licence to Inukshuk Wireless Partnership (“Inukshuk”). As a result of this sale, the Corporation pursued potential investment opportunities to utilize the Corporation’s cash and tax attributes in an effort to maximize shareholder value.

On March 25, 2013, the Corporation entered into a securities purchase agreement, pursuant to which the Corporation agreed to acquire all of the outstanding shares of Sunwave Gas & Power Inc., a privately-held provider of innovative energy commodity products and services based in Toronto, for aggregate consideration of \$1,000. Consideration for the transaction will be satisfied through the issuance of 3,383 multiple voting shares and 3,760 subordinate voting shares in the capital of the Corporation, each valued at \$0.14 per share. Concurrently with the execution of the securities purchase agreement, the Corporation entered into subscription agreements with a group of investors, pursuant to which the investors will subscribe, on a private placement basis, for an aggregate of 30,447 multiple voting shares and 33,839 subordinate voting shares in the capital of the Corporation at a price of \$0.14 per share for aggregate subscription proceeds of \$9,000.

In accordance with the policies of the Exchange, the Corporation’s multiple voting shares and subordinate voting shares were halted from trading upon announcement of the transactions, and remained halted as at May 31, 2013.

The transactions closed on July 9, 2013 (note 16).

As at May 31, 2013, the Corporation was listed on the NEX, the trading symbol for the Corporation’s multiple voting shares was LOK.H, and subordinate voting shares was LOK.K. (note 16(c)).

These unaudited condensed consolidated interim financial statements were approved for issue by the Board of Directors on July 19, 2013.

2. Summary of significant accounting policies

12. Contingencies

- (a) In the normal course of its operations, the Corporation may be subject to litigation and claims.
- (b) The Corporation indemnifies its directors, officers, consultants, and employees against claims and costs reasonably incurred and resulting from the performance of their services to the Corporation, and maintains liability insurance for its directors and officers.

13. Management of capital

The Corporation determines capital to include shareholders' equity. The Corporation's overall strategy with respect to management of capital is to hold low-risk highly-liquid cash accounts and short-term investments.

The Corporation currently does not use other sources of financing that require fixed payments of interest and principal due to the lack of cash flow from current operations and is not subject to any externally imposed capital requirements.

The Corporation invests its capital in short-term investments to obtain adequate returns. The investment decision is based on cash management to ensure working capital is available to meet the Corporation's short-term obligations while maximizing liquidity and returns of unused capital.

On March 13, 2012, the Corporation paid a distribution of \$6,985 to the holders of its multiple voting shares and subordinate voting shares, as a return of capital (note 7(b)).

14. Financial instruments and risk management

The Corporation's activities may expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate, foreign currency risk and commodity and equity price risk).

14. Financial instruments and risk management (continued)

Credit risk

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial instrument fails to meet its obligations. The Corporation's maximum exposure to credit risk at the end of the reporting period under its financial instruments is summarized as follows:

	May 31, 2013	August 31, 2012
<u>Accounts and other receivables</u>		
Currently due	\$ 117	\$ 108
Past due by 90 days or less not impaired	48	116
Past due by greater than 90 days not impaired	535	404
	\$ 700	\$ 628

All of the Corporation's cash is held with a major financial institution in Canada, and management believes the exposure to credit risk with this institution is not significant. The Corporation's maximum assessed exposure to credit risk, as at May 31, 2013 and August 31, 2012, is the carrying value of its accounts receivable and other receivables.

Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet its obligations associated with financial liabilities. The Corporation has a planning and budgeting process in place by which it anticipates and determines the funds required to support normal operation requirements. The Corporation coordinates this planning and budgeting process with its financing activities through the capital management process described in Note 13, in normal circumstances.

The Corporation's financial liabilities, as at May 31, 2013 and August 31, 2012, are comprised of its accounts payable, accrued restructuring liabilities and accrued liabilities, and are summarized as follows:

	May 31, 2013	August 31, 2012
Contractual maturities -		
Within 90 days or less	\$ 757	\$ 504
In later than 90 days not later than one year	347	411
	\$ 1,104	\$ 915

Interest rate risk

The Corporation had no significant exposure, as at May 31, 2013 and August 31, 2012, to interest rate risk through its financial instruments.

d) Court Decision

On Friday, September 28, 2012, the Ontario Superior Court of Justice dismissed applications and motions made by certain of the Corporation's former officers and directors and personal service companies for interim advances to finance their costs of defending claims made against them by the Corporation.

The Court denied the advances sought by Messrs. On June 18, 2013, the Corporation advanced \$150 to Mr. Dolgonos (note 10(d)).
